

CAD CONSULTANT JOB DESCRIPTION

Job Brief :

We're looking for a CAD (Computer-Aided Design) consultant who can play a crucial role in assisting organizations with the implementation, customization, and optimization of CAD software solutions.

Responsibilities :

1.Consultation and Needs Analysis: Collaborate with clients to understand their specific requirements, workflows, and challenges related to CAD software usage.

2.Software Implementation: Lead the implementation process of CAD software solutions, including installation, configuration, and setup according to client specifications.

3.Customization: Customize CAD software to align with client requirements, including developing custom features, templates, and libraries.

4.Training and Education: Conduct training sessions and workshops to educate clients on CAD software functionalities, best practices, and techniques to optimize productivity.

5.Workflow Optimization: Analyze existing CAD workflows and processes to identify areas for improvement and efficiency gains. Propose and implement solutions to streamline workflows and enhance productivity.

6.Integration: Integrate CAD software with other enterprise systems, such as PLM (Product Lifecycle Management) software, ERP (Enterprise Resource Planning)

systems, and CAM (Computer-Aided Manufacturing) software, to facilitate seamless data exchange and collaboration.

7.Stay Updated: Stay abreast of the latest developments, trends, and advancements in CAD technology and related fields to provide informed recommendations and insights to clients.

Qualification:

- Bachelor's degree in Engineering, Computer Science, ECE, or related field.
- Proven experience in CAD software implementation, customization, and support.
- Proficiency in CAD software platforms such as AutoCAD, SolidWorks, CATIA, Creo, or similar.
- Project management experience is desirable, including the ability to prioritize tasks, manage timelines, and deliver results within budget constraints.
- Certification or training in CAD software platforms is a plus.

Salary: As per Industry Standards

Experience : 4-6 Years

Location : PAN India
